Receipt is acknowledged of the Amendment filed July 11, 2005.

Reasons for Allowance

Claims 1-16 are allowable over the prior art of record.

The following is an examiner's statement of reasons for allowance: the best prior art of record, Morris, taken alone or in combination of other references, does not teach or fairly suggest a voltage level shifting circuit comprising, among other things, a fourth MOS transistor which is coupled between the first power supply node and the output node, which has the first withstand voltage, which has a gate directly coupled to one of the complimentary signals, and which electrically connects the first power supply node to the output node in response to a voltage potential of the one of the complimentary signals (claims 1 and 9); the pair of second MOS transistors constitute a current mirror load (claims 6 and 14); and a constant current element which is coupled between the first electrodes of the first MOS transistors and the first power supply node (claims 7 and 15), as set forth in the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
